

CIT BROADBAND

Virginia's Leading Broadband Resource

Center for Innovative Technology

Mission

Accelerate Virginia's socio-economic growth through the application and use of broadband telecommunications.

Broadband Path

CIT provides technical assistance by leveraging its nationally recognized methodology, The Broadband Path. The Broadband Path is a three-step process to:

1. Perform a comprehensive broadband assessment.
2. Help the locality determine its needs and goals.
3. Facilitate public-private partnerships between local governments and Internet Service Providers.

Assessment

Decision Points

Partnership

CIT's Broadband Path is distinctive because it produces tangible, goal-driven, fiscally achievable broadband solutions at no cost to the locality.

Leadership

- Promotes and assists in developing broadband-related policies.
- Staffs the Commonwealth's Broadband Chief Advisor, Broadband Advisory Council, and the Office of Telework Promotion and Broadband Assistance.
- Serves as a liaison between elected officials, federal and state agencies, providers, localities, and citizens.

Resource

- Serves as a repository of broadband information including: broadband funding, best practices, and coverage maps.
- Assesses strategies and solutions designed to close gaps in Virginia's broadband coverage and performance.
- Performs statewide studies.
